Notices for the Weekly Roundup
If you have information to include in the Roundup, send all information (i.e., who, what, when, where and why to Tracy Rich (richt@msu.edu)

Seminars will be posted the week preceding and the week of the seminar. Thank you for your cooperation.

Have a safe and happy Memorial Weekend!

MAKE A NOTE OF IT

Emergency Generator Testing
Maintenance Services personnel will be testing the emergency generator at Anthony Hall. This will require Infrastructure Planning and Facilities electricians to have the life safety systems power off on Friday, June 7, 2013 from 6:15 a.m. to 7:15 a.m. This shutdown will affect the stairwell lighting, exit lighting, fire alarm systems, phone systems and any other equipment on the emergency generator. This shutdown will not affect normal building power.

EVENTS

Open House
The Office of the Registrar is hosting an open house for tours of their newly renovated office space. The open house will be Friday, June 14, 2013 from 3:00 p.m. to 5:00 p.m. Hannah Administration Building, 426 Auditorium Rd, Room 150.

ANIMAL FUN FACTS

Just Plain Cute

“While swimming, penguins will leap in shallow arcs above the surface of the water, a practice called porpoising. This coats their plumage with tiny bubbles that reduce friction, allowing them to swim as fast as 20 miles per hour. It may also help them evade predators and allows them to breathe more regularly, and some scientists theorize that they may make these leaps out of sheer joy.”
