

2018 MSU Extension Cover Crop Field Walks

MSU Extension Cover Crops Team will be hosting a series of informal field walks looking at different cover crops and how they work in different cropping systems. This is an opportunity for producers and agriculture professionals to visit cover crop field sites to observe and discuss cover crop use, management, benefits and challenges with MSU Extension educators and producers in various locations throughout Michigan. These walks are being scheduled on Thursdays from 5:00 - 7:00 pm.
