

Graduate Certificate in

# Forest Carbon Science, Policy, and Management

Michigan State University's Forest Carbon Science, Policy, and Management Certificate equips graduates with the interdisciplinary tools and conceptual background to plan, implement, manage, and evaluate forestry-based, climate change mitigation projects. As professionals, Certification provides an edge in competing for opportunities in forest carbon project development, REDD+ policy making, and advising on carbon mitigation investments for corporations, governments, and non-governmental organizations.

## Quick Facts

- Professional Certificate delivered entirely online
- Three key courses build knowledge and technical skills
- Practitioner-focused
- Bachelor's Degree required
