2014 turf management internship
at Omni Bedford Springs Resort

Omni Bedford Springs has been ranked among the top public and resort courses in Pennsylvania for four years. We have been ranked in the top 100 resort courses since the restoration in 2006. Omni Bedford Springs Resort and Spa has a very unique history dating back to 1796, with the golf course dating back to 1895. A.W. Tillinghast reduced the course to nine holes in 1912 and Donald Ross expanded the course back to 18 holes in 1923. In 2005, the golf course went through a complete 8 million dollar restoration by Ron Forse, who restored it back to the 1923 Donald Ross version. We feature greens that are USGA specification A1/A4 bentgrass.

Educational Requirements: Currently enrolled in a 2 or 4 year degree or certificate program in turf management, or related field at an accredited university
