**Objective**
- More walkable/pedestrian friendly
- Stronger connection from the core of the city to the business park
- Improve drainage and sewage system
- Delegate entrance of Webberville
- All day entertainment for tourists and residents
- Stronger connection from the core of the city to the business park
- More walkable/pedestrian friendly

**Goals**
- Growth in the 21st century
- Highlights school system
- Expand green space system
- Establish historical culture
- Highlight school system
- Improve wayside
- Improve parking
- Improve pedestrian

**Concept Statement**

The fabric of a community sews together a place of being. Webberville is a small town looking to move forward and add to its appeal. A downtown is a composite of streets, buildings, and open spaces, morphing into an intricate pattern. The arrangement created mimics the design of a quilt that represents what Webberville means as a place. The quilt will display a fine balance of downtown amenities without forgetting the rural heritage that makes up the character of Webberville.

**Slope Inventory**
The village of Webberville is relatively flat. The soils are well drained and suitable for agricultural land use. The surface water and drainage of the village is relatively flat. The highpoints of the landscape are located toward the east and the adjacent areas. The surface water and drainage are areas with steep slopes creating interesting topography for the village creating a need for drainage system replacement.

**Soil Analysis Map**

**Climatic Analysis**
The climate for the village of Webberville shows optimal periods for outdoor activities. Being located in Michigan, Webberville only experiences a minimal amount of inclement weather. There is also a select few time periods where people are comfortable outside. The warmer months have warmer temperatures with sunshine and comfortable wind speeds creating an atmosphere for biking, picnicking and other outdoor activities. The colder months are usually spent inside, with the renovation of downtown Webberville will be able to utilize their streetscape, not only during the summer, but during the winter as well. The streetscape will provide outdoor recreation for winter months and other activities.
