

## Calhoun County Field Crop Fall Meeting

Wednesday, September 5th from 5:00—8:00 PM

The MSU Extension Field Crops team in Southwest Michigan invites you to a field meeting in Calhoun County on Wednesday, Sept. 5, 2018 from 5:00 to 8:00 pm at field plots located north of Homer at the corner of 24 1/2 Mile Rd. and L Drive S. Demonstration plots in LibertyLink soybeans showing the efficacy of various herbicide programs at different price points will be highlighted. Attendees will tour the weed control plots, and photos of two other fields in the demonstration—one LibertyLink and one Xtend—will also be shared. MSU Extension nematode specialist Marisol Quintanilla and regional field crop educators will be presenting on various topics to help you prepare for fall—see agenda on the back.

The event is FREE thanks to the sponsorship of the Michigan Soybean Promotion Committee, but registration is required for space and meal planning. Register by phone (269-781-0784) or email ([msue.calhoun@county.msu.edu](mailto:msue.calhoun@county.msu.edu)) with the Calhoun County Extension office by Friday, August 31st.

## **Not receiving regular updates from the MSU Extension field crops team?**

An e-newsletter is sent out weekly during spring and early summer, tapering off to monthly in the off-season. The newsletter contains timely observations and recommendations for crop production and protection, a calendar of upcoming programs and events related to agriculture, and quick links to recent articles published by MSU Extension educators and specialists. To sign up, contact Eric Anderson ([eander32@msu.edu](mailto:eander32@msu.edu)) with the following information: name, farm/business name, address, phone number, email address, and any additional insights (ex. “I used to work with Natalie Rector on research plots”, “I would like Extension to help me with \_\_\_\_\_”, “I think Extension should focus more on the topic of \_\_\_\_\_”).
