Inquiring Minds Want to Know Science Activities for Young Minds

Inquiring Minds Want to Know Resources

Science is in the world all around us and affects our everyday lives. Look for experiential learning opportunities in activities involving music, art, cooking, math, outdoor walks and more.

When planning, think about how you can help children see the science involved. You may need to do some research ahead of time so that you understand, but it can be fun for you and your children.

Your child might not be a future scientist, but you never know, so help him or her get off to a good start.
