Short Snapshot Video

https://www.youtube.com/watch?v=nFmek_sesfo
Step 1: Draw a horizon line

Draw a horizon line in the middle of the paper.
Step 2: Draw a vanishing point

Use a rule to draw the vanishing point on the horizon line at 9 ½ inches in.
STEP 3: Draw a GEOMETRIC SHAPE

- Use a ruler to draw this geometric shape.
- Use the following dimensions.
- On the horizon line, make a line at 1-inch and 3-inches.
- Then draw a 2-inch line above and below the horizon line.
STEP 4: CONNECT THE CORNERS TO THE VANISHING POINT

USE A RULE TO DRAW A LINE FROM THE CORNER OF THE GEOMETRIC SHAPE TO THE VANISHING POINT.
Step 4: Continued

- Use a rule to draw a line from the corner of the geometric shape to the vanishing point.
- Repeat on other side.
Step 4: Continued

ON THE HORIZON LINE, MAKE A LINE AT 4 INCHES. THEN USE A RULE TO DRAW A STRAIGHT LINE.
Step 4: Continued
ERASE UNNECESSARY LINES
Step 5: Add details

ADD A DOOR WITH A DOOR KNOB.
Step 5: Continued

- Add three widows. Two windows will be rectangular, and one window will be circular.
- Then draw two straight lines down the middle of the windows.
Step 5: Continued

- On one side of the vanishing point draw two lines that are spaced out evenly.
- On the other side of the vanishing point draw another two lines that are spaced out evenly.
- Once lines are drawn on either side of the vanishing point, draw lines in between the two lines that are already drawn.
- In the middle of the vanishing point draw a line with dash marks. This line should not be connected.
Step 5: Continued

Next add lines on the house. (This detail is adding siding to the house).
Step 5: Continued

- The last step of this project is to randomly add lines on the house. Refer to picture to left.
- Now is the time to use the color pencils. Color pencils can be used to add color to your project.
Project Complete

- Hope you enjoyed taking this countywide project.
