

**MSU Center for  
Systems Integration and Sustainability**

**Boone & Crockett Distinguished Lectureship Series**

**Energy, Wildlife  
and Jobs:  
Environmental  
and Economic  
Realities**

**Gale Norton**

*Former U.S. Secretary of the interior  
Senior Adviser, Clean Range Ventures*

Norton will look at the relative footprints of renewable energy and fossil fuels, as well as the siting problems that will be faced by renewable mega-projects, the potential impacts on wildlife habitat and other land uses, and the folly of hoping for a magic bullet.

A member of President George W. Bush's cabinet, Norton from 2001-2006 managed more than 20 percent of the land area of the United States, a Fortune-500-sized budget and a workforce of 70,000 employees.
