Dairy Store Policy: Donation Requests

Donation requests should be sent to the MSU Dairy Store Manager via mail, email, or filled out in person. The Donation Request Application can be found on the MSU Dairy Store website at: http://www.canr.msu.edu/dairystore/contact.

Requirements:

- A donation request must be sent a minimum of 30 days prior to the event and the application must be filled out properly and entirely
- Aligns with the mission of the MSU Dairy Store*

Applicant will hear back about his/her donation request within two (2) weeks before the month in which the event is being held. Applicants must then pick-up their donation before the date of the event. If a donation is not picked up it will be returned to the Dairy Store’s inventory.

Our Mission*:

Instruction: The undergraduate and graduate programs of Food Science and Human Nutrition in the College of Agriculture and Natural Resources serve those students wishing to pursue careers in the dairy/food processing industries. To adequately prepare students for their careers, access to the latest technology and equipment, appropriate to the dairy/food industry, is essential.

Research: New technologies of processing along the issues of food safety and diet/health present a formidable challenge to strengthening the research program in dairy processing. The presence of a facility housing modern analytical and pilot laboratories enhances the ability of the scientists at MSU to address these important issues.

Extension/Outreach: The faculty in the Department of Food Science and Human Nutrition serve as important resources for the dairy and food processing industries in Michigan. During the last 15-20 years, the technology incorporated in dairy and food plant design and the detail in regulation has become increasingly complex. A modern processing plant is maintained to aid in the training of industry and regulatory personnel for Michigan’s dairy processing industries.
