

Forest Carbon & Climate Program

Fall Online Graduate-Level Course

Forest Carbon Policy, Economics and Finance

This course is part of the Certificate in Forest Carbon Science, Policy, and Management.

—

This online course is offered each fall semester and provides participants with an overview of policy, economic and finance associated with forest carbon and an in-depth examination of international, regional, and national case studies. You will build capacity in the following skills:

- Assessing forest carbon and climate change policy
- Applying cash-flow and market analysis to a case study/project
- Analyzing national-scale forest carbon projects

Join us to learn in an applied and skill-building learning experience!
