Our work **helps people and organizations** working to improve our food system to **be more effective.**

Food hubs thrive and expand regional access to Michigan food

Livestock producers of all scales thrive

Local food councils engage residents in systems change

OUR VISION is a thriving economy, equity, and sustainability for Michigan, the country, and the planet through food systems rooted in local regions and centered on Good Food: food that is healthy, green, fair, and affordable.

OUR MISSION is to engage the people of Michigan, the United States and the world in applied research, education and outreach to develop regionally integrated, sustainable food systems.

We believe these networks are the most effective way to advance our vision—a food system **rooted in local communities**, and centered on **“Good Food.”**

A Good Food System supports:

- A thriving economy
- Equity
- Sustainability
