UNMISTAKABLE SIGNS OF AGRI-FOOD SYSTEMS TRANSFORMATION IN AFRICA

T.S. Jayne and Holger Kray

Seminar at Agricultural Working Group meeting
9 April 2018
Dar es Salaam, Tanzania
7 UNMISTAKABLE SIGNS OF AGRI-FOOD SYSTEM TRANSFORMATION IN SSA

1. Major growth in per capita incomes
2. Impressive agricultural growth rates
3. Rise of commercialized African investor farmers
4. Rapid investment in agricultural value chains by African entrepreneurs
5. Diversification of the labor force into off-farm activities
6. Greater vibrancy of agricultural factors markets
7. Improved market access conditions for African farmers
7 UNMISTAKABLE SIGNS OF AGRI-FOOD SYSTEM TRANSFORMATION IN SSA

1. Major growth in per capita incomes
RISING REAL INCOMES

- 35% growth in inflation-adjusted real p.c. incomes in SSA, 2000-2014
  - Doubling in many countries

- Poverty rates falling for the region
  - % of people living on less than $1.90 a day declined from 54% in 1990 to 41% in 2013 (Barrett et al., 2017)
7 UNMISTAKABLE SIGNS OF AGRI-FOOD SYSTEM TRANSFORMATION IN SSA

1. Major growth in per capita incomes

2. Impressive agricultural growth rates
Annual inflation-adjusted agricultural growth rates, 2000-2016:

- Sub-Saharan Africa: +4.62%
  - Tanzania: +3.50%
- East Asia: +3.07%
- South Asia: +2.96%
- Latin America: +2.49%
- World: +2.75%
AGRICULTURAL VALUE ADDED ANNUAL GROWTH RATES 2000-2016 (constant local currency units)

MEDIUM SCALE FARMS’ SHARE OF TOTAL CROP VALUE IN TANZANIA – 14% TO 30% IN 6 YEARS

% of total crop value by farm size category

7 UNMISTAKABLE SIGNS OF AGRI-FOOD SYSTEM TRANSFORMATION IN SSA

1. Major growth in per capita incomes
2. Impressive agricultural growth rates
3. Rise of commercialized African investor farmers
4. Rapid investment in agricultural value chains by African entrepreneurs
RAPID INVESTMENT IN AGRICULTURAL VALUE CHAINS BY AFRICAN ENTREPRENEURS

• 8-fold increase in the volumes and value of food marketed through rural-to-urban value chains since 2000 (Tschirley et al, 2017)

• Underlying drivers:
  – rapidly rising urban demand
  – high global food prices
  – agricultural sectoral reforms of 1990s

CHANGE IN FARM HOUSEHOLDS’ DISTANCE TO SERVICES IN RURAL KENYA, 1997-2010

Source: Chamberlin and Jayne, 2012
1. Future ag growth needed from higher value per hectare and per laborer, not just area expansion.
AFRICA’S AGRICULTURAL GROWTH STILL RELIES MAINLY ON CROPLAND EXPANSION, NOT ENOUGH ON PRODUCTIVITY GROWTH

1. Africa’s labor force diversifying away from subsistence farming
2. Share of labor force in non-farm employment up sharply since 2000
3. Governance has improved, albeit unevenly. Days of hyperinflation, black market exchange rates and macro turmoil largely over.
4. Greater proportion of young Africans acquiring secondary and university educations
5. Per capita GDP increased between 2000 and 2014 by 35% in real terms. SSA has been world’s second-fastest growing economy, exceeded only by Asia
6. +4.6% inflation-adjusted p.a. ag growth between 2000-2016 (WB, 2017) vs. world avg. of 2.75%
7. Women have become considerably more active in labor markets and better able to hold stocks of wealth on their own
8. Poverty rates declined significantly since 2000
9. Nutritional indicators also show gradual but clear improvement

SUMMARY: UNMISTAKABLE PROGRESS IN SSA
YOUTH LIVELIHOODS OPTIONS 62% < 25 years

- 40% Non-farm
  - 10% Successful non-farm
  - 30% Struggling non-farm

- 60% Farming
  - 50% Struggling farm
  - 10% Successful farm

Pulled out of agriculture
- In jobs with high barriers to entry
- Post-secondary education
- Invested in skills

Pushed out of agriculture
- Relatively unskilled / limited education
- Limited access to land / finance
- Mainly informal sector / wage workers

Pushed into agriculture
- Few productive assets
- Poor access to land, finance, knowledge
- High concentration of poverty

Pulled into agriculture
- Good access to land, finance, etc.
- Favorable market access, infrastructure
- Diversified income sources

1. Future ag growth needed from higher value per hectare and per laborer, not just area expansion

2. Land/soil degradation – will make continued agricultural transformation more difficult unless addressed
   • Proximate causes: low adoption of “climate smart” and “sustainable” land management practices
   • Underlying culprits – ineffective national ag R&D and extension systems

3. The “employment challenge”: each year, roughly 17 million young Africans enter working age
LOOMING EMPLOYMENT CHALLENGE IN SSA
