Celosia, Act Diva

*Trial Plant*

**Company Name:** Evanthia

**General Description:** Tall thin light green stalk with a deep red, brain-like fasciated flower that is soft to the touch. Gets to be about 2 to 3 feet tall.

**Comments:** Great plant that could work well in the ground or in a container or as a cut flower but seems to flop, likely due to the flower head weight. It adds great texture and color to the garden, and other than flopping seems healthy.
