Company Name: Proven Winners

General Description: Deeply lobed leaves that are a dark purple. Purple red petioles that grow close together on the main stem. Excellent ground cover with a wide spread and a height of about 12 inches.

Comments: They add a beautiful color to any garden and have filled in so well they’ve had to be cut back in their trial area a couple times. They work very well in the ground and could work well in a container but be careful as they could take over.
