**Juncus Graceful Grasses® Curly Wurly**

*Trial Plant*

**Company Name:** Proven Winners  
**General Description:** Short dark green curly stalks of grass, some of which resemble a wand, with a mounded center and an overall cone form. Not the best in ground as they stay very small but they are a great texture, fun to look at and could work great in a container as a filler.  
**Comments:** Great plant for texture but because of small size and little spread it might look better in a container. Seems to have done well in Michigan weather with consistent sizing and a healthy look.

**Pictures:** *Hard to see with some much green on green*
