Marigold Endurascape Sunset Gold

*Trial Plant*

**Company Name:** Syngenta

**General Description:** An annual with dark green leaves and yellow to yellow orange flowers. They stay short and have little spread.

**Comments:** A plant that does well in the ground and would look good in a container as well. It has a long flowering period and although it needs to be deadheaded, dead flower heads normally aren’t super noticeable. They seem to need little management and to do well in Michigan weather.
