Welcome to the annual garden plant hunt tour where at each sign you will be given a list of descriptions that will lead you to a plant located in the annual garden. Once you reach the next plant the process will repeat with a new sign and QR code to lead you to the next plant until you eventually reach the final bed containing all the plants in the hunt. Included below is the description for the first plant you will have to find. Good luck!

**Plant One Description**

- Short and compact form
- Center is compact and further out looks wispier
  - Stem-like single cylindrical curly leaves
  - Dark green
