- Evaluating, developing, and selling new greenhouse structure and/or equipment solutions
- Cultivating and maintaining customer relationships through the power of information, success focused guidance, and support
- Representing/promoting company via written or verbal communications and presentations

Minimum Qualifications:

- Strong mechanical/engineering aptitude and prior experience in the horticulture industry
- Knowledge in greenhouse structure, heating, cooling, lighting, benching, controls and systems
- Strong written, verbal and face to face communication skills
- Ability to work independently to drive results
- Excellent time and project management skills with strong attention to details
- Ability to use sound judgement with good mechanical aptitude and deal with problems involving several concrete variables
- Multi-state travel required (travel expenses covered by company)
- Proficient in AutoCAD (version 2014 or higher)
- Proficient in Microsoft office suite
- Valid driver's license

Exceptional Qualifications:

- 4-year degree in horticulture or agricultural engineering preferred, but not required.
- Five years of experience in horticultural

Compensation/Benefits:

- Base salary and performance-based bonus programs
- Health and dental insurance available
- Access to company matching 401K program
- Company provided office equipment and supplies

About LLK Greenhouse Solutions:

LLK Greenhouse Solutions is a national greenhouse design, supply and construction company headquartered in Cleveland, Ohio. LLK has serviced the Greenhouse Industry nationwide for over 80 years. Although our core business was built on emergency repair and recovery, the strategic relationships we have forged with vendors and suppliers have enabled us to offer additional solutions focused on helping commercial, institutional and cannabis greenhouse operators compete more successfully.

Our partnership approach focuses on identifying the needs of our customers and implementing design, supply/material and construction solutions that yield improved greenhouse functionality and results. The experience on our team is deep and spans across multiple industries and business disciplines including commercial and institutional greenhouse design, project management, manufacturing, build out, maintenance and emergency repair. As we continue our rapid growth we never forget about our vision of customer/employee success and continue to add team members that share our same passion.
