Spring 2021

## **NURSERY AND FIELD POSITION AVAILABLE FOR THE 2021 SEASON**

### **Mason, MI**

Wildtype is an ecologically focused native plant nursery and environmental contractor looking to fill 2 field technician positions for the 2021 field season. These positions will include working both on-site at the nursery and off-site on a variety of restoration projects. These are full-time positions and start in mid- March and will run through fall.

These positions involve working at the nursery as well as off-site on a variety of environmental stewardship projects, which include invasive plant species management, planting, and other restoration projects. Working off-site involves the use of herbicide and therefore requires having or obtaining a Michigan Department of Agriculture pesticide applicators license in categories 5 and 6. Working off-site also requires safe and skilled use of chainsaws and brush cutters. Working in the nursery involves transplanting, watering, weeding, and preparing orders for pickup or delivery.
