

Undergraduate Research Position

- \$15/hr,
- 30-40 hrs per week
- May-August
- Research experience
- Professional development
- Networking

We are seeking undergraduate students to participate in research related to pest management in agricultural systems. Students will have the opportunity to gain valuable lab and field research skills in a supportive environment and learn about vegetable production systems. We have several ongoing research projects and we aim to pair students with projects that fit their career goals closely. Students should commit to full-time employment from mid-May to mid-August.

Lab website: <https://vegetable.ent.msu.edu/>

- Qualifications:**
- Currently enrolled undergraduate student at Michigan State University in biology or a related field
 - Ability to work in the field and lab

TO APPLY

1. Please send a resume or CV highlighting your academic and extracurricular professional activities.
2. Provide a statement of research interests, outlining your passion for sustainable agriculture, horticulture, entomology, and agroecology.
3. Request a letter of recommendation from one professor or mentor who can speak to your potential in research.
4. **Send email to Zsofia Szendrei (szendrei@msu.edu) by March 22, 2024.**

- Punctuality, attention to detail
- Enthusiasm, willingness to learn
- Interest in research
- U.S. citizenship or permanent residency and valid driver's license is required.
