January 2020

NURSERY AND FIELD POSITION AVAILABLE FOR THE 2020 SEASON

Mason, MI

Wildtype is an ecologically focused nursery and contractor looking to fill field technician and nursery positions for the 2020 field season. These positions start in March or April and will run through fall. These are full-time positions, but a part-time schedule would be considered. The schedule would include working at least one weekend day per week.

The nursery position involves working at the nursery transplanting, watering, weeding, and preparing orders for pickup or delivery. The field technician position involves working at the nursery and off-site on a variety of environmental stewardship projects, which include invasive plant species management, planting, and other restoration projects. Working off-site involves the use of herbicide and therefore requires having or obtaining a Michigan Department of Agriculture pesticide applicators license in categories 5 and 6. Working off-site also requires safe and skilled use of chainsaws and brush cutters.
