## FEED THE FUTURE INNOVATION LAB FOR LEGUME SYSTEMS RESEARCH

December 2021

The Feed the Future Innovation Lab for Legume Systems Research fosters dynamic, profitable, and environmentally sustainable approaches that contribute to resilience, productivity, and better nutrition and economic opportunities. The lab is managed by Michigan State University.

*From the Management Office*

**Holiday greetings and wishes for a healthy new year**

**H**oliday greetings from the entire team at the Feed the Future Innovation Lab for Legume Systems Research.

As we reflect on the events of 2021, we are thankful for the creative and dedicated researchers who continue to find creative and safe ways to further innovation in legumes as the world adapts to life amongst Coronavirus.

Best wishes for a safe and healthy 2022.

**- SAVE THE DATE -**

**Look for registration information coming soon**

Attention Legume Lab Researchers:  
Please also save February 17 for internal project meetings

## **Workshop explores lentil systems in Nepal to identify innovation solutions needed to strengthen value chain**

The Feed the Future Innovation Lab for Legume Systems Research, in partnership with the Nepal USAID Mission, held a two-day exploration of lentil systems in Nepal December 15 & 16. Over 65 lentil stakeholders attended the two-day event.

This interactive workshop featured global and local experts delving into the current state of lentil systems in Nepal, exploring current and future global lentil systems innovations. The conversation was further enhanced through an interactive discussion among all participants designed to identify innovative solutions to strengthen the entire value chain across Nepal.

Look for a more detailed report on workshop outcomes in the January edition of the Legume Lab news.

Special thanks to Nepal based collaborators at the Ministry of Agriculture and Livestock Development, National Grain Legume Research Program, and CIMMYT for their valuable insights in planning the technical program.
