

### Clover Leaf Barrel Pattern

- Cloverleaf Barrel Race Barrels should be the size of a 55-gallon drum, with no sharp edges. Each barrel should be painted so that it can be easily distinguished from the background. Protective devices around steel barrel tops are required.
- The size of the pattern (see fig. 23) should be 105 feet (35 yards) between barrels 1 and 2, 120 feet (40 yards) between barrels 2 and 3, 120 feet (40 yards) between barrels 1 and 3, and 75 feet (25 yards) from the timer to the first barrel. The course must be measured exactly.
- Riders have the option of riding course A or B.
  - Course A – The entry must cross the timing line, circle barrel 1 clockwise, circle barrel 2 counterclockwise, circle barrel 3 counterclockwise and run between barrels 2 and 3 to cross the timing line.
  - Course B – The entry must cross the timing line, circle barrel 2 counterclockwise, circle barrel 1 clockwise, circle barrel 3 clockwise and run between barrels 2 and 3 to cross the timing line. A 5-second penalty will be assessed for each barrel knocked down.
