Strengthening Families Program: For Parents and Youth 10-14

A parent, youth, and family skills-building curriculum designed to:

– Strengthen parenting skills
– Build family strengths
– Prevent teen substance abuse and other behavior problems

Strengthening Families Program: For Parents and Youth 10-14

Recognized by the following agencies:

• Office of Juvenile Justice and Delinquency Prevention
• Substance Abuse in Mental Health Services Administration
• Center for Substance Abuse Prevention
• 4-H Program of Distinction
• National Institute on Drug Abuse
• US Department of Education

Awards:

• Annie E. Casey Foundation Family Strengthening Award

Blueprints Certified: Meeting the highest standards of evidence through independent review by the nation's top scientists.
Features of the Program

- Prepares families for the transition to the teen years
- Parents and youth learn together
- Videos portray parent-child interaction
- User friendly materials
- Fun, interactive projects and activities
- Used cross-culturally
- Rigorously evaluated

Program Format

- Developed for parents and youth 10-14
- Designed for 7-10 families
- Seven two-hour sessions with graduation
- Four Booster Sessions may be held 3-12 months later

Session Format

- First Hour
  - Parent Group
  - Youth Group
- Second Hour
  - Parents and youth together in family session
- Facilitators
  - 1 for parent sessions
  - 2 for youth sessions
  - All 3 facilitate the family session
Program Activities

- Short lectures
- Videos
- Discussions
- Skills practice
- Learning games
- Family projects

What are Risk Factors?

Risk factors are any circumstances that may increase the likelihood of youth engaging in risky behaviors

- Exposure to multiple risk factors has cumulative effects
- There are different risk factors for different age groups
- It is desirable for prevention to occur before the first onset of the risky behavior

What are Protective Factors?

Protective factors are any circumstances that promote healthy youth behaviors and decrease the chance that youth will engage in risky behaviors

- Individual characteristics: temperament, dispositions, and skills may cushion the effects of adversity or stress.
- Attributes of the child’s environment: such as social support, parental warmth, appropriate discipline, adult monitoring and supervision, and bonding to family or other positive role models may also function as protective factors.
Parental Risk and Protective Factors Addressed by SFP 10-14

Risk Factors
- Demanding and rejecting behavior
- Poor child management
- Harsh and inappropriate discipline
- Poor communication of family rules

Protective Factors
- Positive parent-child affect
- Supportive family involvement
- Age-appropriate expectations
- Appropriate parental monitoring
- Clear expectations regarding substance use

Youth Risk and Protective Factors Addressed by SFP 10-14

Risk Factors
- Aggressive or withdrawn behavior
- Negative peer influence
- Poor school performance
- Lack of prosocial goals
- Poor relationship with parents

Protective Factors
- Positive future orientation
- Peer pressure resistance skills
- Prosocial peer relationships
- Positive management of emotions
- Empathy with parents

Topics of Parent Sessions

- Love and limits
- Supporting youth’s dreams and goals
- Need for house rules and using “I” statements
- Point charts to encourage good behavior
- Building a positive relationship
- Making consequences fit the behavior
- Listening to youth
- Meeting basic needs – belonging, enjoyment, power, independence
- Protecting against ATOD in youth
- Getting help and finding resources
### Topics of Youth Sessions

- Round of compliments
- Goals and dreams – Treasure Map
- What’s easy and hard about being a youth/parent
- Why parents are stressed
- Understanding stress
- Rules and consequences for breaking rules
- How drugs and alcohol can get you in trouble
- Peer pressure resistance skills
  - Ask questions, name the problem, tell what could happen, suggest another route, start on your way, tell them to join you, saying your friend’s name and “listen to me,” stay cool and calm
- Good and bad qualities of friends
- Peer panel

### Topics of Family Sessions

- Learning more about family members
- Family tree / family strengths
- Family meetings
- Family values / family shield
- Joint problem solving
- Reaching goals game
- Parents share dreams & expectations with youth
- Graduation celebration

### PUBLISHED RESULTS

FROM LONGITUDINAL SCIENTIFIC EVALUATION

1993 - CURRENT
**Age of First Use Predicts Alcoholism**

![Graph showing the percentage of individuals later classified as alcohol-dependent based on their age of first use of alcohol.](image)

**Lifetime Alcohol Use without Parental Permission**

Lifetime alcohol use without parental permission, 6th grade baseline through 10th grade follow-up of students receiving SFP 10-14 and control group students.

At the 10th grade, SFP 10-14 students exhibited a 32% relative reduction in alcohol use compared to control group students ($p < .01$).

**Lifetime Drunkenness by Condition**

Lifetime Drunkenness Through 6 Years Past Baseline: Logistic Growth Curve

Meth Initiation Results at 4½ Years Past Baseline

![Chart showing meth initiation results at 4½ years past baseline.]

Program Effects on Other Substances

Changes in Aggressive Behavior

Positive Discipline by Parents

Symptoms of Depression and Anxiety Among Girls
Randomized, Controlled Trials (RCTs)
Testing Long-term Effects of Universal Preventive Interventions – Overview

- Three longitudinal RCTs (data collected up to 14 years past baseline)
- School districts assigned to study conditions
- Universal interventions tested
  - Iowa Strengthening Families (ISFP)
  - Preparing for the Drug Free Years (PDRY)
  - Like Skills Training (LST)
  - Strengthening Families Program: For Parents and Youth 10-14 (SFP 10-14), plus LST
  - SFP 10-14 plus evidence-based school program (PROSPER)
- Examined question of whether comparable or greater benefit for higher-risk youth (risk-related moderation)

Study 1: Longitudinal Results
Project Family Young Adult Outcomes

Study 2: Longitudinal Results
CaFaY Young Adult Outcomes
Study 3: Longitudinal Results
PROSPER Long-term Impact on Young Adult Lifetime Misuse

PROSPER vs. control differences are practically significant: For every 100 misusers in non-PROSPER communities, there would be about 20-26 fewer in PROSPER communities.

Benefit-Cost Analysis

Landmark International Analysis of Family Programs

- Designed to identify effective programs
- Reviewed 6,000 Studies of Programs Designed to Prevent Alcohol Misuse in Young People
- Funded by the World Health Organization
- Conducted by Foxcroft and colleagues, Oxford Brookes University, Oxford, England
- Used strict criteria following the approach of the International Cochrane Collaboration, Drugs and Alcohol Review Group

Copyright © 1993 Iowa State University of Science and Technology
Conclusion from World Health Organization Sponsored Review

“Disappointing results from school-based programmes have encouraged interest in family interventions. The one with the best track record is the US Strengthening Families Programme: 10-14, an approach now being tried in Britain.”

- David Foxcroft, Oxford Brookes University
(Cochrane Collaboration Systematic Review, 2002)
Foxcroft, Ireland, Lister-Sharp, Lowe and Breen

Parents say...
“The most valuable thing I learned”

• “to listen to my child and their feelings”
• “not criticize my child personally when I’m angry”
• “to set rules and consequences and still show love”
• “reminded to show love and listen with respect to my child”

Parent Testimonials

• Since there was a court order for my son to do this, we both felt it would be a waste of time. We both were wrong. Not only has it shown me ways to deal with the troubled time we as parents face raising our children, he also learned to handle the stresses of being a teenager and peer pressure. We have shared the things that we have learned with others in our family, that did not attend the program. I have to say that things are going much better for us all.
• It is a great tool in helping families stay strong and work together in tough times. It also helps to make those great times even greater. Please know that this program is going to help many families, that might not have the resources to find it on their own.
• This is the first time since my son was born that my husband and I have been on the same page.
Youth say…
“The most valuable thing I learned…”

• “to deal with peer pressure”
• “that my parents have stress too”
• “how to talk to mom and dad”
• “how to solve problems”
• “to do things together more”
• “consequences when I get in trouble”
• “my parents love me”

One facilitator’s testimonial
“As a facilitator, I am sold on the program. I am thankful for every family who has participated and hope that they find the tools, skills, and strategies we have shared helpful. I am grateful to the community leaders and extension personnel who have supported and promoted the program. Single parents, traditional families, grandparents, and blended families all share common needs, goals, and challenges.”

- Diane Lair, Winterset, Iowa

Another facilitator’s testimonial
“I’ll tell you this, PROSPER and SFP:10-14 are a big part of my family’s lives. I did the program personally with each of my boys and the three of us are team members! It has taught us all so much.....making time for quality family time and family meetings to respect each others time and scheduling is needed nowadays with teenage boys! I’m sure the peer pressure steps helped them because they have a great group of friends! We love it! Thanks for the opportunities!”

- Cori Wright, Scranton, PA
“I learned that it’s easier to talk it out than fight and yell.”

Family tree activity (adapted tribal strengths canoe for Co-Salish tribes) helps parents and youth come together and see themselves as family.

Parents: “I appreciated the family meeting, point system and ensuing negotiations with youth.”
Families talked about their family values. Families then made a shield representing their family values.

Newport News, Virginia

Youth and parents learned to reach their goals

Newport News, Virginia

Families had fun together with the knot game.

Hampton, Iowa
During the family session, parents & youth worked on their communication & problem solving skills.

Newport News, Virginia

Parents: “We learned to show love and appreciate each other.”

Hampton, Iowa

“I learned what a fantastic child I have.”
