SCREENING FOR HERBICIDE-RESISTANT WEEDS

- Mature, high quality seed is required. Please refer to "[Tips for collecting weed seeds](#)" on our website for collection details. The screening process takes 2-4 months to complete, depending on the species.
- Courtesy of the MI Soybean Promotion Committee, MI soybean growers qualify for free testing of the following species: Palmer amaranth, waterhemp, horseweed/marestail, common lambsquarters, common & giant ragweed.
- Screening of these weeds from rotations not including soybeans is available for \$90/sample. Screening of other species may be possible in consultation with Diagnostic Services.
