

# Vanguard Russet (TX08352-5RUS)

**Pedigree:** TXA549-1RUS x Reveille Russet

**Developers:** crossed and selected by Texas A&M University

**Plant Variety Protection:** In Process

## MORPHOLOGY

**Plant:** Semi-erect growth habit

**Tubers:** Uniform oblong tubers, small to medium tuber size, medium russet skin

## AGRONOMICS

**Maturity:** Medium

**Yield Potential (US#1) cwt/A\*:** 397 (222 - 624)

**Utilization:** Fresh market, early processing

**Specific Gravity\*:** 1.061 (1.055 - 1.074)

**Seed Spacing:** 10 to 11 inch in-row seed spacing is recommended

**Dormancy:** Moderate

**Strengths:** Good type and uniform tuber shape, resistant to common scab and Fusarium dry rot. Few oversize tubers.

**Weaknesses:** Lower SG and solids, susceptible to Verticillium wilt and early die, shatter bruise.

## UTILIZATION

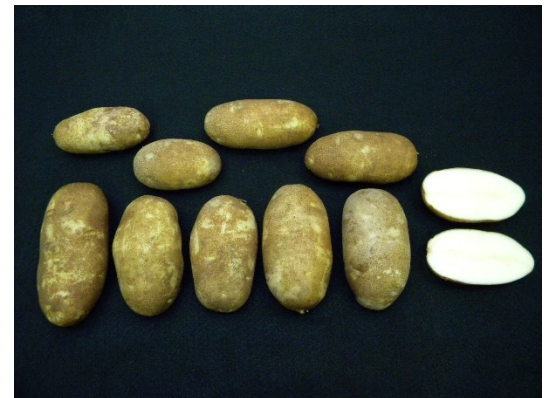

This fresh market russet has early process potential but is not recommended for processing out of storage. In Michigan, at 10 inch in-row spacing, it has an average yield potential with few oversized tubers and over 10 percent undersize potatoes. Higher yield was observed under field management practices consistent with Russet Norkotah. The skin finish is more similar to that of Russet Burbank, while the tubers are oblong and not as long as Russet Norkotah.

\*Data reflects the mean with range in parenthesis from 26 trials in two years.

Prepared Trina Zavislan, Chris Long, and John Calogero, MSU Potato Outreach Program ([canr.msu.edu/potatooutreach](http://canr.msu.edu/potatooutreach)) to inform Michigan growers on variety performance.
