

Summer Internship Opportunity

Halbert National Golf Club – Granbury, Texas

Halbert National Golf Club is an exclusive private golf course located in Granbury, Texas. We are seeking a motivated summer intern who is eager to learn all aspects of a high-end golf course maintenance operation.

Internship Overview

This internship is designed for students enrolled in a Turfgrass Science program or a closely related field. The intern will work closely with the maintenance team and gain hands-on experience in daily operations, project work, and long-term agronomic planning.

What You'll Learn

- All aspects of golf course maintenance and agronomy
- Turfgrass management, irrigation, and cultural practices
- Equipment operation and maintenance fundamentals
- Course setup and presentation standards
- Team leadership and communication within a professional maintenance operation

Turfgrass Varieties

- TifEagle Bermudagrass greens
- Stadium Zoysia tees and fairways
- Zeon Zoysia rough

Potential Projects

Project involvement will vary based on timing, weather, and course priorities, and may include:

- Stream and drainage improvement projects
- Native grassland establishment and maintenance
- Construction and addition of select tee boxes
- Small-scale landscaping enhancements throughout the property
- Main entry drive improvements and associated landscape work

Compensation & Work Schedule

- \$18–\$20 per hour, with overtime opportunities
- Housing assistance available
- Uniforms provided
- Rotating schedule with every other weekend off
- Holiday work required as part of a professional golf course operation
- Internship runs May through September (dates flexible depending on school schedule)

How to Apply

Interested candidates should contact:

Gerad Nelson

Director of Agronomy

Phone: 972-415-7310

Email: gerad.nelson@halbertassoc.com

This internship offers hands-on experience at a premier private facility and exposure to real-world construction, renovation, and agronomic projects that go beyond daily maintenance.
