Re: 2014 Noble Summer Research Scholar Internships

Enclosed please find a program poster for the 2014 Noble Summer Research Scholar Program. This program offers internships in plant science to qualified undergraduates.

Summer Research Scholars work side-by-side with a mentor scientist and laboratory members from the Noble Foundation's Plant Biology Division or Forage Improvement Division. Summer Research Scholars perform a research project specifically tailored to their interests and educational background, and are involved in all laboratory activities, while conducting experiments to further their own research project. At the conclusion of the program, Summer Research Scholars present their findings to the Noble Foundation scientific community.

Please display our poster at an appropriate location and encourage your interested students to apply. The application deadline is February 14, 2014.

Thank you for your help in this matter. If you have any questions or need additional information, including past scholar research summaries, please contact me at edrousey@noble.org or by phone (580) 224-6206 or visit our program web page at www.noble.org/summer-scholar.

Best regards,

Emily Rousey
Scholar Program Coordinator

Re: 2014 Lloyd Noble Scholars in Agriculture Internships

Enclosed is a program poster for the 2014 Lloyd Noble Scholars in Agriculture program. This newly created program offers internships in agriculture to college students with at least a junior level classification.

The Noble Foundation’s Lloyd Noble Scholars in Agriculture Program offers students the opportunity to assist in a research project while working alongside and learning from professional researchers and consultants. The Noble Foundation Agricultural Division offers educational opportunities in its core areas of expertise: agricultural communications, agricultural economics, agricultural education, agronomy, animal science, farm and ranch management, horticultural crop management (emphasizing pecans), natural resources management, plant and soil sciences, rangeland ecology and management and wildlife and fisheries management. This program provides students the opportunity to work directly with a team of consultants and research scientists in the development and implementation of farm- and ranch-based consultation and research.

Please display our poster at an appropriate location and encourage your interested students to apply. The deadline for submission of the application packet is Feb. 14, 2014, or until suitable candidates are identified. Interested applicants should apply immediately.

Thank you for your help in this matter. If you have any questions or need additional information, please contact me at rlmcmillan@noble.org or by phone (580) 224-6403 or visit our program web page at www.noble.org/noble-scholar.

Sincerely,

Becca McMillan
Executive Assistant
Agricultural Division
