

COLLABORATIVE PARTNERSHIP

MASTER OF SCIENCE

IN CONSTRUCTION MANAGEMENT

MICHIGAN STATE UNIVERSITY

School of Planning, Design & Construction

Since 2026

Michigan State University (MSU)'s School of Planning, Design and Construction and Shandong Jianzhu University (SDJZU)'s School of Management Engineering have established an academic cooperation agreement to encourage faculty and student engagement, educational exchange, and collaborative research in construction management. This academic partnership bridges strong foundational training in engineering management with world-class research, industry engagement, and innovation in construction management.

Partnership Highlights & Student Benefits

- Academic & Research Collaboration: The partnership encourages educational exchange, academic engagement, and collaborative research opportunities in construction management.
- Holistic Admissions Review: Qualified SDJZU students will receive priority consideration through a holistic admissions review process, with emphasis on recommendations from SDJZU.
- Merit-Based Scholarship Opportunities: Qualified applications from SDJZU will be considered for available merit-based scholarships upon admission to the MSCM program.
- Admission & Visa Documentation Support: Admitted students will receive official admission documentation to support their international student visa applications.
