1998 BUSINESS ANALYSIS SUMMARY FOR DAIRY FARMS

1998 Michigan Telfarm/MicroTel Data

Staff Paper No. 99-37, 59 pages

by

Sherrill B. Nott¹

Introduction

The body of this report is organized as follows:

I. Introduction and Table of Contents

- A. List of Tables
- B. Data Source
- C. Per Unit Income and Expense

II. List and sequence of Tables for 1998

A.	Averages of 154 Dairy Farms, All Sizes	
1.	Livestock and Crop Production Summary.....	Page 4
2.	Farm Income Statement.....	Page 5
3.	Farm Income Statement, continued.....	Page 6
4.	Inventory Changes.....	Page 7
5.	Depreciation and Other Capital Adjustments	Page 8
6.	Profitability and Liquidity Analysis.....	Page 9
7.	Balance Sheet at Cost Values.....	Page 10
8.	Balance Sheet at Market Values.....	Page 11
9.	Statement of Cash Flows	Page 12
10.	Financial Guidelines Measures	Page 13
11.	Operator Information and Nonfarm Summary	Page 14
B.	Averages of 38 Dairy Farms, 20 to 75.9 Milk Cows	Page 15
	Same tables as above, numbered Table 12...22	
C.	Averages of 32 Dairy Farms, 76 to 120.9 Milk Cows	Page 26
	Same tables as above, numbered 23...33	
D.	Averages of 36 Dairy Farms, 121 to 200.9 Milk Cows	Page 37
	Same tables as above, numbered 34...44	
E.	Averages of 48 Dairy Farms, 201 to 1,400 Milk Cows	Page 48
	Same tables as above, numbered 45...55	
F.	56. Per Unit and Expense (139 Farms)	Page 59

¹ Professor and Farm Management Specialist; phone 517-353-4522 or nott@msu.edu Co-workers in the Telfarm/MicroTel project were R. Betz, L. Borton, R. Clark, S. Harsh, M. Kelsey, G. Kole, T. Purdy, W. Schauer, G. Schwab, D. Stein, and V. Varner with the assistance of Michigan State University Extension Agents. AgriSolutions co-workers were Kelly Tobin, Gary Lenneman, Steven Eshelman and Jan Raymond. Farm Credit Services of Wisconsin co-worker was Steve Zimmerman. Salisbury Management Services co-worker was Mike Fassler.

Data Source

Farm types were assigned using the 1992 Census of Agriculture's Standard Industrial Classification (SIC) definitions. Basically, any farm with 50 percent or more of value of farm sales from one item becomes a farm of that type. Dairy farms have 50 percent or more of value of combined sales from milk and cull dairy animals.

This report is a summary of the financial and production records kept by dairy farmers enrolled in the Telfarm/MicroTel record program through Michigan State University Extension., or were accounting clients of AgriSolutions in Michigan, or of Salisbury Management Services in Michigan, or of Farm Credit Services of Escanaba. Farm records were included if a Finan² summary was completed on 1998 data including beginning and ending balance sheets, plus income and expenses. The summary was included if cash discrepancy was less than 10% of gross cash inflow, and if the debt discrepancy was less than \$1,000. The averages are reported in the tables below; it should be recognized that considerable variability exist in the data. The unweighted mean of the net farm income for the 154 farms was \$115,246; the standard deviation of the mean was \$170,951 and the median was \$71,975. The unweighted mean of cows was 194 cows; the standard deviation of the mean was 204 cows and the median was 139 cows. The unweighted mean of pounds of milk sold per cow was 19,808 pounds; the standard deviation of the mean was 3,669 pounds and the median was 19,926 pounds.

This report has three purposes: 1)to provide statistical information about the financial results on dairy farms during 1998; 2)to provide production costs for comparative analysis and forward planning; and 3)to provide information on the trends in resource use, income and costs during the last few years. For dairy farm averages for 1995, see Staff Paper No. 96-86, Michigan Farm Database, New Directions for 1995; it contains averages of 106 dairy farms calculated with Finansum. Staff Paper No. 97-31, Business Analysis Summary for Dairy Farms, contains averages of 146 dairy farms for 1996. Staff Paper No. 98-29, 1997 Business Analysis Summary for Dairy Farms, contains averages of 132 dairy farms for 1997. These staff papers are available from the author.

Finansum allows rapid analysis of group averages with some degree of choice over how the results are presented. I prefer to show the average of the high or low 25 percent by net income, but only if the 25 percent means 6 or more farms. The farm was accepted in the average regardless of whether the farm was a proprietorship, partnership, limited liability company, or corporation. Finansum will produce a variety of report options; I included a subset in this publication.

The farms included in the averages below are not a random sample. They kept their financial records with Michigan State University's Telfarm/MicroTel accounting project, or had their accounting supervised by AgriSolutions, or by Salisbury Management Services, or Wisconsin Farm Credit Services' Escanaba office. A higher percentage of these farms use debt capital than do all farms in the state. The averages may be representative of bigger and better managed dairy farms.

Per Unit Income and Expense

Table 56 gives the per acre cash income, cash expense and depreciation for 139 of the 154 dairy farms. Fifteen of the 154 did not report any crop acres, so the items in the table are based on the other 139. They had an unweighted average of 673.1 acres. These included owned acres plus land cash and share rented. Table 1 shows most leased ground was cash rented.

Table 56.
