

# **KEVIN RIEL**

DOUBLE R

# Moxee Hop Company, 1893

# Agenda

Water - Irrigation

timing/amount/frequency

Training

scheduling/techniques

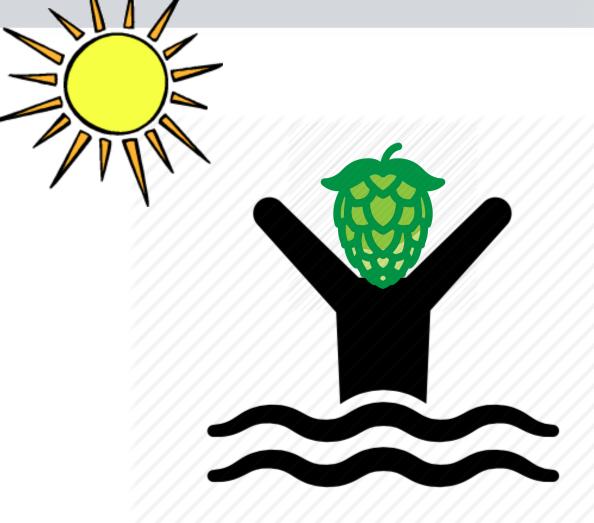

Fertilization

timing/frequency/rates/techniques

"Hops like their heads dry, and their feet wet!"

### Water

- Application technique matters
- How far is water applied from crown?
- Is moisture already present in the field?
- Run-off, nutrition issues

Water

- Disease incidence
- Oxygen depredation
- Fusarium Canker, Phytophthora, Downy Mildew (wet head)
- Humidity level (PM)

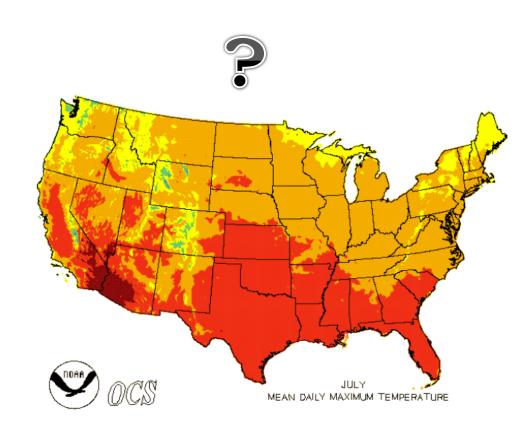

# **Training**

- Proper pruning "starts the clock"
- Does the field need to be pruned at all?
- Vigorous varieties may need twice
- Carbohydrate reserves from winter
- Photoperiod sensitive

# **Training considerations**

- Latitude daylight length
- Breeding for photoperiod
- General weather degree days/heat units
- Micro climates
- Wind/ other growing considerations

# **Training**

- Order of pruning/training
- Slower growing varieties first
- Need proper amount of vine structure
- Sunlight penetration for flowering
- Number of vines to train
- Type of vine to train

# **Training**

### **Sample Order**

Cascade

Sorachi Ace

Willamette

Virus-free Cascade

Amarillo

Centennial

Cluster

Citra

Ekuanot

Zeus

Bravo

Eureka!

# Weather Record keeping

# **Training**

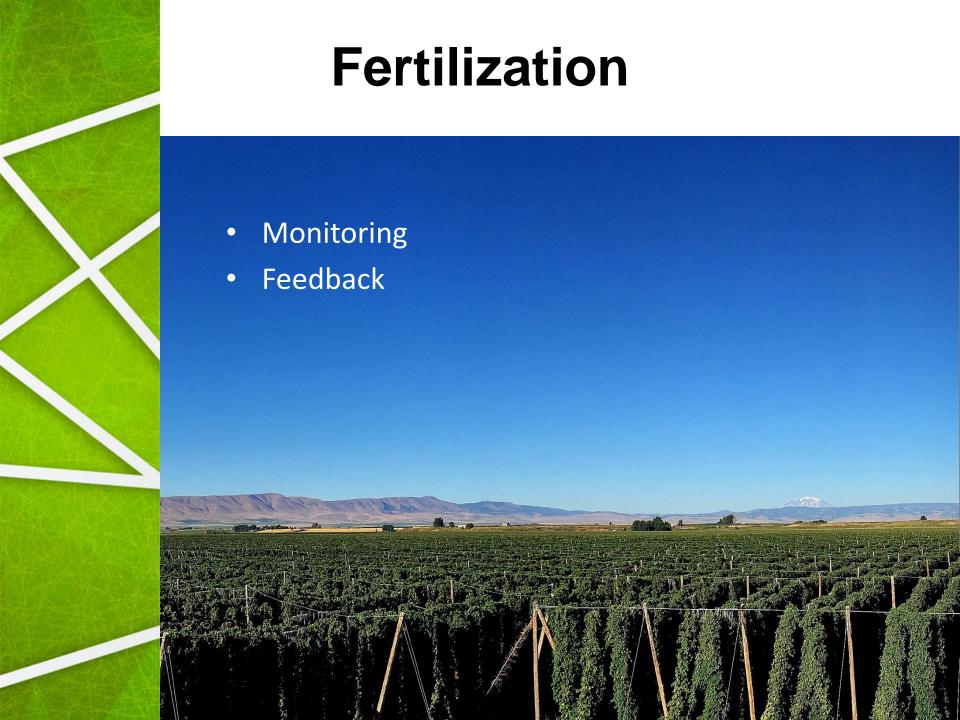

- What worked/ Feedback?

### **Fertilization**

- Nitrogen requirements (first year, versus mature)
- P&K
- Application techniques
- Timing
- Soil pH and organic matter
- Micronutrients (Zn, B, Ca)
- How to apply micros?

# How do we improve?

Accurate records of:

Weather – different each year Training dates and techniques Harvest data

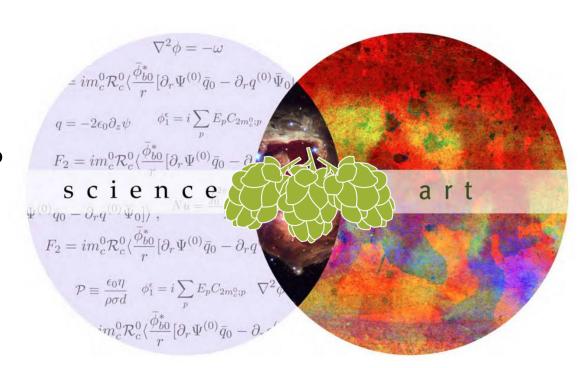

### Science versus Art?

- Records
- Weather data
- Boots on the ground
- What does it feel like?
- Experimentation

# **Background & History of HGA**

# **Background & History of HGA**

- Established in 1957 to represent the interests of US hop growers
- Current areas of focus include:
  - statistics
  - public relations
  - trade education
  - foreign market development
  - community of knowledge and best practices
  - Research
  - Small grower council (at large Non-PNW board pos.)
