Total	65.1	255.8	0.2	256.0	264.4	286.0

NW MI - Harvest continues very strongly. It will go through Weeks 7 & 8. Quality and character still holding up very well and scores are still quite good. Growers report picking at or above original estimates in many areas. Rain in Week 7 should help with fruit size.

UT - A large and good quality crop. Growers have already exceeded estimate by 11 million pounds. Harvest will probably finish with Week 7. The cherries are still scoring very well.

WI - Quality has been generally very good. Growers are picking to their estimates. Harvest will continue at least through Week 7 and maybe longer.

Harvest Complete - SW MI, WC MI, NY, OR, PA, WA. There could be adjustments to figures as handlers review records.
