

Spotted Wing Drosophila Workshops

April 11, 2011 and June 1, 2011

Trevor Nichols Research Center
6237 124th Avenue
Fennville, MI 49408

Call today...registration is limited! To the first 30 attendees

Attend one of these classroom workshops and the follow-up field workshop for **hands-on** training on this new invasive insect by MSU experts. Participants will learn about how to identify this new insect, how to trap for it, and how to sample fruit for it. This program is designed for growers, scouts, and consultants to learn about SWD before the field season starts, so management of this pest can be integrated into IPM programs.

Come to one of these (all the same material)

Monday, April 11, 2011
