

# Number of Boilers Using Solid Fuel (presume most are wood)

Data Source: BCC-Boiler Division, Michigan Department of Licensing and Regulatory Affairs

The largest users of wood-fueled boilers are utilities and forest industry.

Of the 197 boilers counted in this graphic, 45 had a boiler size listed as zero.

The LARA included 78 solid fuel boilers that were excluded from this graphic, mostly "antique boilers" with a boiler size listed as zero.
