

2021 Guidelines for onion thrips management

Cornell AgriTech
New York State Agricultural Experiment Station

Brian A. Nault, Professor
ban6@cornell.edu

0.6-1 thrips per leaf;
prebulbing

Movento or Senstar

7-14 days

Movento or Senstar

- Assumes 6 insecticide applications total in season
- Maximum of 2 applications of a product per season
- Assumes action threshold of 1 thrips per leaf, unless specified otherwise

0.8-1 thrips per leaf

1-2 thrips per leaf

3-5 thrips per leaf

OPTION A

Agri-Mek SC

Agri-Mek SC

Exirel

Exirel

OPTION B

Minecto Pro

Minecto Pro

≥ 3 thrips per leaf

Radiant SC

Radiant SC

OPTION C

Radiant SC

Radiant SC

0.8-1 thrips per leaf

Lannate + Warrior

Lannate + Warrior

Exirel

Exirel

Note: The different colored boxes signify different IRAC classes and modes of action. Also, Agri-mek SC and Exirel should not be used in a sequence with Minecto Pro because that violates the label.
